EDUCATION

Vellore Institute of Technology, Chennai

B.Tech in Computer Science and Engineering (AI/ML), CGPA: 9.0/10.0

2023 – 2027

Chennai, India

Nine Education Academy

Telangana State Board (XII), 93.5%

2021 – 2023

Hyderabad, India

TECHNICAL SKILLS

- **Languages:** Python, Java, Kotlin, C++, JavaScript, TypeScript, SQL
- **Audio/ML:** FFmpeg, yt-dlp, Silero VAD, Pyannote, torchaudio, librosa, soundfile, HuggingFace Transformers
- **ASR/TTS:** IndicConformer, Whisper, Sarvam AI APIs, NLLB-200
- **ML Frameworks:** PyTorch, LangChain, OpenAI APIs, Gemini AI, Scikit-learn
- **Backend:** FastAPI, Flask, Django, Spring Boot, Node.js
- **Tools:** Git, Docker, AWS EC2, CI/CD, PostHog

EXPERIENCE

Daira Edtech

AI/ML Development Intern

Jul 2025 – Sep 2025

Remote

- Engineered AI-powered educational tools using LangChain, OpenAI APIs, and RAG architectures for personalized learning
- Built document processing pipeline parsing 5,000+ resources with 95% accuracy in content extraction
- Implemented CI/CD pipelines reducing deployment time by 60% and improving workflow efficiency

SPEECH & AUDIO PROJECTS

Telugu Speech Data Pipeline | Python, yt-dlp, FFmpeg, Silero VAD, Pyannote, IndicConformer

GitHub

- Engineered an automated speech-data acquisition pipeline for Telangana Telugu content, handling metadata extraction, large-scale audio download, resampling, and preprocessing.
- Built speaker-aware annotation workflows using Silero VAD, Pyannote diarization, and overlap-based speaker attribution to label conversational audio.
- Generated training-ready JSONL datasets with transcripts, timestamps, and speaker metadata using AI4Bharat IndicConformer ASR, with robust handling of noisy and long-form podcast audio.

AI Video Knowledge Editor | Python, FastAPI, FFmpeg, Sentence-Transformers, PyInstaller

GitHub

- Built AI video editor adding contextual knowledge cards using speech-to-text, NER, and semantic retrieval
- Implemented transcription via Sarvam AI API and Whisper, zero-shot entity extraction (GLiNER + NLTK), semantic ranking (MiniLM)
- Integrated Sarvam AI translation (mayura:v1) for Indian languages with fallback to NLLB-200 for offline processing

QuickShare | Kotlin Multiplatform, Ktor, JSch, Jetpack Compose

GitHub

- Developed anonymous P2P file sharing app with secure SSH reverse tunneling (localhost.run)
- Implemented Ktor CIO server, JSch for tunnel management, and QR code generation for instant sharing

ACHIEVEMENTS

- 4th Place at Juphack 2025 among 100+ participating teams

ADDITIONAL PROJECTS

Telugu → Hindi S2S Dataset Builder | Python, IndicTrans2, MMS-TTS, Hugging Face Datasets, PyTorch Notebook

- Built a multilingual speech-to-speech dataset generation pipeline that streams Telugu speech from IndicVoices, translates transcripts using IndicTrans2, and synthesizes Hindi speech using MMS-TTS to create parallel Telugu–Hindi speech pairs.
- Engineered batched GPU inference (96 samples/batch), checkpoint-based recovery, shard-wise dataset generation, and automated Hugging Face publishing on Kaggle T4 GPUs for scalable speech corpus creation.
