## PROFESSIONAL EXPERIENCE

|                                                                                                                                                                                                                                                                                   |                    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|
| <b>Daira Edtech</b> — <i>AI/ML Development Intern</i>                                                                                                                                                                                                                             | Jul 2025 - Present |
| <ul style="list-style-type: none"><li>Developing intelligent systems using LangChain, OpenAI APIs, and RAG architectures</li><li>Implementing embedding-based solutions for educational applications</li><li>Building backend services with Python and Django framework</li></ul> |                    |

## EDUCATION

|                                                                    |             |
|--------------------------------------------------------------------|-------------|
| <b>Vellore Institute of Technology</b> , Chennai, India            | 2023 – 2027 |
| Computer Science - AIML — CGPA: 9.0                                |             |
| <b>Nine Education Academy</b> , Hyderabad                          | 2021 – 2023 |
| Telangana State Board of Intermediate Education — Aggregate: 93.5% |             |
| <b>Sri Sai Public School</b> , Hyderabad                           | 2020 – 2021 |
| ICSE (Class X) — CGPA: 9.2                                         |             |

## TECHNICAL SKILLS

### Frontend Development:

TypeScript — JavaScript — React — Next.js — Tailwind CSS — Shadcn UI

### Backend & APIs:

Node.js — Express — Flask — FastAPI — RESTful APIs

### AI/ML Stack:

Python — LangChain — OpenAI APIs — RAG — Embeddings — Django

### UI/UX & Styling:

CSS3 — Tailwind CSS — Responsive Design — Figma

### Tools & Platforms:

Git — GitHub — Vercel — AWS EC2 — MongoDB — PostgreSQL

## PROJECTS

|                                                                                                                                                                                                                                                                             |                                              |        |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------|--------|
| <b>Solana Voice Assistant</b>                                                                                                                                                                                                                                               | <i>Next.js — TypeScript — Solana Web3.js</i> | [2025] |
| <ul style="list-style-type: none"><li>Voice-controlled Solana wallet with Jupiter Swap API integration</li><li>Implemented Web Speech API for voice commands and real-time feedback</li><li>Developed secure wallet operations with Solana blockchain integration</li></ul> |                                              |        |
|                                                                                                                                                                                                                                                                             | Code                                         | — Live |
| <b>E-Commerce Frontend</b>                                                                                                                                                                                                                                                  | <i>Next.js — TypeScript — ShadCN UI</i>      | [2025] |
| <ul style="list-style-type: none"><li>Developed responsive e-commerce UI with product listings and cart functionality</li><li>Implemented Next.js App Router for seamless navigation</li><li>Created component library with ShadCN UI and custom Tailwind configs</li></ul> |                                              |        |
|                                                                                                                                                                                                                                                                             | Code                                         |        |

## HACKATHON CONTRIBUTIONS

|                                                                                                                                                                                                |                          |                |
